Artificial Intelligence for the first time in the world to create a portrait of a living person.

Unique photograph depicts the legendary Ukrainian scientist, current President of the National Academy of Sciences of Ukraine Boris Paton, who on Wednesday, November 27, 2019 celebrated her 101st birthday. Art work with his image entitled "The Genius."

As explained by Sergey Melnikoff for Artificial Intelligence wrote a special algorithm with the task in one photo to realize 100 years of life of a particular person. To create it, Boris Paton's portrait photographs taken since 1920 were used.

According to Melnikoff, who is the founder of the International Charity Foundation "The Soul of Ukraine," the Board of Trustees of which is headed by Dr. Paton, the idea was born when the organization was preparing a gift for the centenary of the legendary scientist. Option to publish the album came to the incredible idea to miss a few thousand images using a supercomputer and make something unique.

The supercomputer analyzed more than two thousand photos of Paton and created its own variant – the generalized portrait of a modern genius. A masterpiece of photography was printed in Ukraine.

Photo portrait of "The Genius" plan to exhibit at the prestigious Heritage auction with a starting price of 500 thousand dollars, and the money will go to charity projects of the Foundation. Recently in Ukraine held the first pre-show, then the work will travel to London and New York.
